

Observers print the candidate's name at the top of a candidate recording form for each candidate that needs one for his/her skill test. Do this during the time when you are doing your skill task organization several days before the test event. Then cut out a recording form for each candidate needing one and slip it under the spring clip with the candidate's skill test where it will be ready to lay out for that candidate before they enter the skill test area on testing day. During the candidate's skill equipment demonstration have the candidate sign the form at the bottom and explain to the candidate that they should use it to record any measurements that they take during the skill test.

**Collect the form only after the candidate leaves the skill test area.**

*Do not look at the form once the skill test begins.*

Copy any candidate recordings onto the candidate's skill task observation form. Attach the signed recording sheet to the paper test packet before mailing it back or securely retain the signed recording sheet for three months before shredding if you are WebETesting.
