

Testing Updates in Missouri

Get Your Students Tested

Do you have students that have completed or are coming close to completing training and want to schedule a test event for them?

If you are an approved test site, you should have been emailed directly from your designated staff member assigned to your test site. If you misplaced that email, or perhaps it went to the wrong person, call our office (1-888-401-0462) and ask for a member of the Missouri Team.

If you are not an approved test site but would like to test your students at your training program facility, please fill out the 1502MO and 1503MO and send pictures of your testing spaces.

Misconceptions about the calendar

The calendar will only show dates that are already set up, with an RN, we can create a test event for your students. We have almost 100 test sites in Missouri, however the dates will only show up as classes end and the demand increases, it does not make any sense for an RN to sit at a location with no students to test.

Regional Testing

With so little need, there has not been much regional (open testing) available, however that is growing as the demand increases. There are more and more dates being added and hopefully students will sign into those, however as mentioned, an RN gives up her day to put an event on the calendar and if there are no students to test, then it is all wasted effort.

Virtual Knowledge Testing

There is an option to test virtually (at home). Students receive a Zoom link and log in showing their IDS through the Zoom App on their phone, they will take the knowledge test on their home computer (2nd device) while being proctored through their smart phone.

Call us at 1-888-401-0462 or email us at hdmaster@hdmaster.com attention: Missouri, and we can create a solution for your students to get tested.
